CASE STUDY

Nansulate® Translucent GP

Customer:

SooSung e-daum Apartments

Location:

South Korea

Product:

Nansulate Translucent GP

ISSUE:

The SooSung e-daum high rise apartments needed an effective insulation that could be applied on the exterior of the building to reduce energy costs and that would not cause occupant disturbance during installation.

PROJECT DESCRIPTION:

Our patented Nansulate Translucent GP coating was applied to exterior of the apartment building. It allowed a protective layer of thermal insulation to be applied, without changing the look of the building. The exterior application allowed work to be done without requiring access to internal apartments and costly removal of walls. Nansulate offered an alternative and cost effective way to insulate the building, reducing energy costs and increasing thermal resistance of the building.
