

## **Boost Fuel Efficiency Boost Horsepower**

You can use the same thermal coating that is used by NASCAR Teams to increase horsepower and engine efficiency.

NanoBoost is available in a convenient quart size and can be used on a variety of automotive parts to help control heat transfer, thus increasing fuel efficiency.

NanoBoost customers have applied the product to areas such as:

- Intake Manifold**
- Fuel Tank and Lines**
- Engine Compartment**
- Engine Air Intake**
- Roof Interior**

**Safe for your family.**

**Safe for your home.**

**Environmentally Friendly.**

**That's our promise.**

**BOOST YOUR COOL™**

Ultra Thin Industrial Grade  
High Performance Automotive Parts Coating

Patented Technology

- For use on automotive parts as a barrier to heat transfer.
- Contain heat, increase horsepower and improve fuel efficiency.
- Keep your interior cooler, reducing the load on the A/C unit and fuel consumed.
- In use by four NASCAR teams and one V8 Super Car team.
- Easily applied by brush or sprayer.

"I put NanoBoost on suggested parts under the hood. Also on exterior and interior of car. My car didn't seem to get as hot, used the A/C less, and also improved gas mileage.

Good stuff!"

-Shane Lawrence  
Onalaska, Wisconsin

NanoBoost at Work

## Earth Friendly Cost Friendly

NanoBoost is part of the Nansulate(R) family of high quality coatings by Industrial Nanotech, Inc. Nansulate(R) is patented greentech technology, which produces superior capabilities for reducing heat transfer and preventing corrosion. Nansulate(R) products also provide mold resistance, lead encapsulation, flame resistance, and chemical resistance.

Above all, Industrial Nanotech produces environmentally friendly products which offer energy saving and protective solutions for individuals, corporations, and governments. We believe that energy saving technology should be affordable enough for everyone to benefit from, which is why our coatings are fast becoming one of the most popular methods for saving fuel and energy dollars.
