## iCAT announces soft contents solution

iCAT Solutions has introduced a soft contents processing solution. "Now contents restoration facilities can operate at the level of dry cleaners," states Jeff Brettell, Director of Sales for iCAT. "They can handle dozens of claims, and thousands of items all at the same time, in an efficient and controlled environment."

This component is the newest addition to the iCAT Contents Restoration Software, and is included as a part of the core product. Contractors interested in exploring this expansion on the proprietary iCAT technology should contact the iCAT sales team to arrange their web demonstration. *For more information circle 238 on the Reader Inquiry Card.*

Industrial Nanotech

## Industrial Nanotech introduces clear lead encapsulation coating

Nansulate LDX lead encapsulation and mold resistant coating by Industrial Nanotech is a clear coating for encapsulation of lead based paint and lead contaminated surfaces. Safely encases surfaces, and is water-based, low VOC and environmentally friendly.

The clear, matte finish allows it to be used without changing design aesthetics. Easily applied with a brush, roller, or sprayer in a 2-coat coverage. 20-year warranty for interior lead encapsulation. In addition to providing a thin film, clear lead abatement option, the coating is also resistant to moisture and mold growth. *For more information circle 239 on the Reader Inquiry Card.*
