

Canvey Island,

England.

27th August, 2008

Mr. E. McGuirk,  
31 Whiteschurch Way,  
Ballyboden,  
Dublin 16,  
Ireland.

Dear Eric,

re: NANSULATE

I live in a 2-bedroomed bungalow with solid walls. In June 07' I painted the internal outside walls with Nansulate and also the immersion tank and pipes.

re: Application

The paint was very easy to use, with good coverage, considering I had to apply 3 coats.

re: Results

Prior to painting, our heating costs were quite high compared to what they are now. In fact, since applying the Nansulate I have been able to lower the thermostat from  $5\frac{1}{2}/6$  to 3, basically halving the temperature. The bungalow is definitely warmer. I am now going to Nansulate the outside external walls which should result in even greater savings in heating costs.

I would certainly recommend Nansulate to anyone who wants to reduce their heating costs. In fact, my sister and her two sons, have now Nansulated their homes. (It was through my sister who lives in Swords, that I was able to order the Nansulate from you).

re: Customer Service

The customer service has been excellent and the delivery of the product extremely fast (3/4 days).

Wishing you all the best with your agency for Nansulate.

Yours sincerely,

Daniel O'Beirne
